Error message not displaying on login failure - Severity: 3

Entering incorrect credentials does not trigger an error message. Page refresh required to retry login.
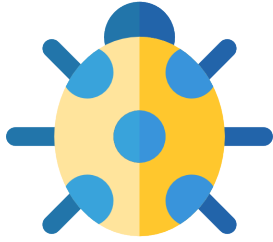

Dropdown menu items missing - Severity: 4

Dropdown menu on navigation bar occasionally fails to display some items. Clicking on the menu reveals only a subset of expected options.
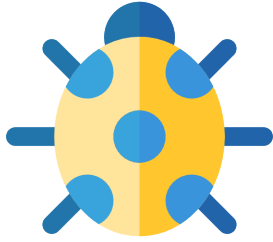

Slow loading times on dashboard - Severity: 5

Dashboard takes significantly longer than usual to load. Noticed delays in fetching and rendering data widgets.
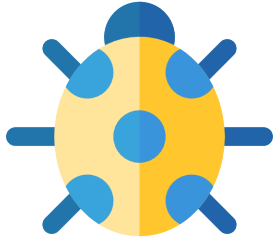

Graphical glitches in image gallery - Severity: 5

Image thumbnails in the gallery are occasionally displaying graphical artifacts. Refreshing the page resolves the issue temporarily.
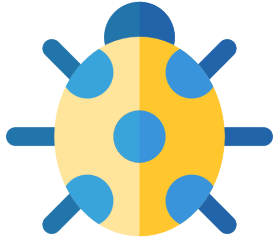

404 error on profile page - Severity: 6

Navigating to the user profile page results in a 404 error. Attempted to access multiple user profiles with the same outcome.
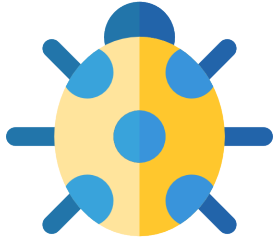

Login page not responsive on desktop - Severity: 6

Login page elements are not resizing properly on desktop screens, causing buttons and input fields to overlap. Tried different browsers with the same issue.
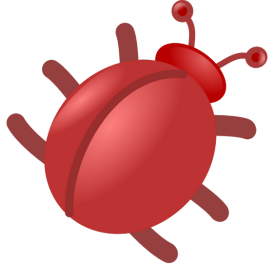

Search functionality not returning results
- Severity: 7

Performed multiple searches using different keywords, but no results were displayed. Search bar appears functional but does not fetch any data.

Incorrect data displayed in analytics - Severity: 7

Analytics charts and graphs are displaying inaccurate data points. Checked against backend records which show correct information.
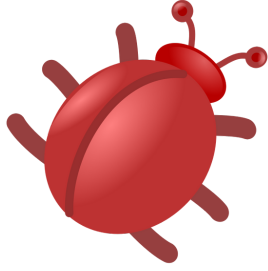

UI layout broken on mobile devices - Severity: 8

UI elements are misaligned and overlapping on mobile screens. Issue observed across different devices and browsers.
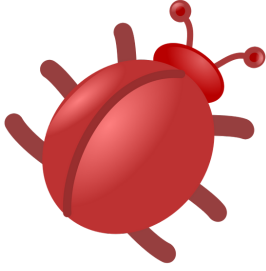

Forms submission not working - Severity: 8

Tried submitting various forms throughout the application, but none of them successfully submit the data. No error messages displayed.

Couldn't load files - Severity: 9

Files failed to load when attempting to open them.
Attempted several times without success.

Data loss on form submission - Severity: 10

Submitting a form occasionally results in the loss of entered data. Issue observed when network connectivity is unstable.
